# Portable Tub Single Alley

Titan West's Portable Tub with a Single Alley uses many of the same features found on the Stationary Tub. This unit can be set up in less than 10 minutes, saving the producer valuable time.

This system uses a full 10' crowd tub that folds to a legal road width. With up to 20' of alleyway, the Portable Tub allows you the flexibility to put your working chute or loading chute in front.

The other option is to have 10' of alleyway and the Titan West Combo Chute in front of the alley. This option includes the Palpation Cage directly behind the Working Chute. The Working Chute has all of the features of Titan West's Combo Working Chute, complete with rubber floor and Chest Rest.

Both systems come with Titan West's E-Z Adjustable Alley, allowing the alley to be adjusted with 15" to 30" with ease. The Titan West "folding No-Back" is placed at the back of the alley. Two hand-operated winches allow you to go from working cattle to road ready in minutes.
