

Portable Tub Twin Alley

In Minutes, You Could Be Working Cattle

Go from road ready to working cattle in ten minutes with the TITAN WEST Portable Tub Twin Alley.

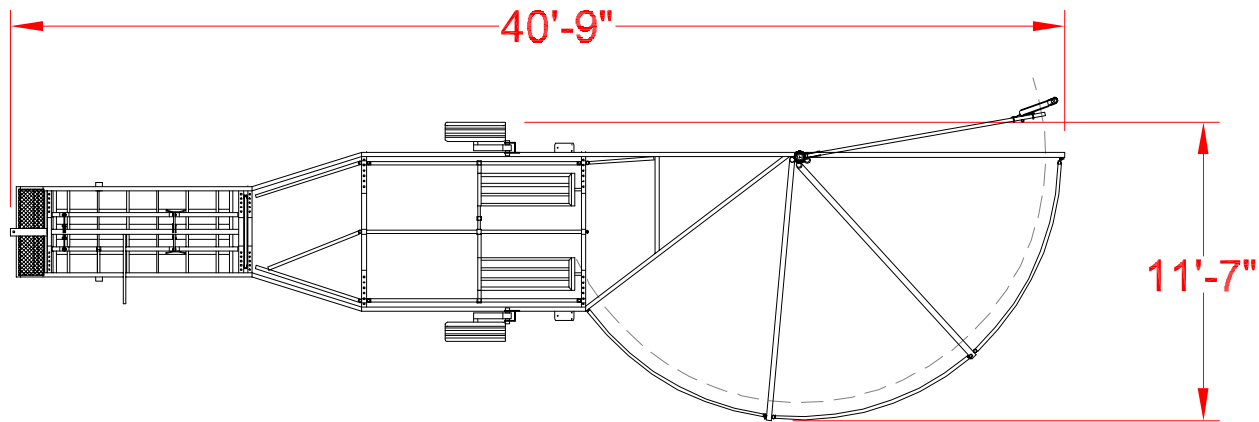

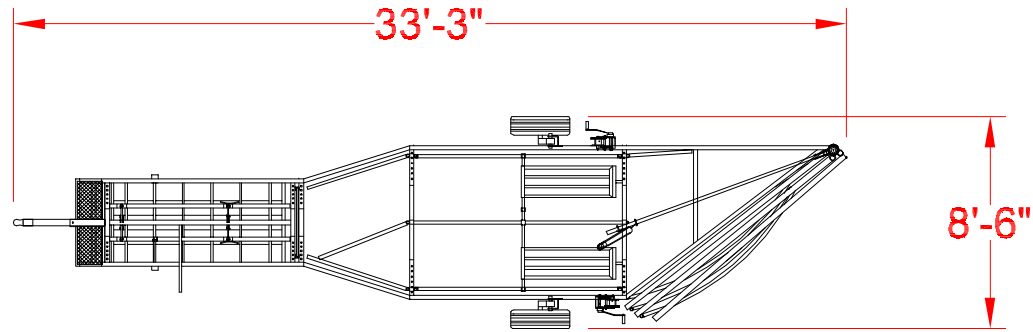

This unit features a full 10' crowd tub, that folds to legal road width. A double alley and palpation cage leading to a single alley with optional chute sides and headgate completes the unit.

The double alley allows for a continuous flow of cattle to your working chute, which results in working more animals in less time. Two hand operated winches allow you to go from working cattle to road ready in ten minutes.
